8:00 A.M. - Noon, Monday - Friday

Aurora Libraries CLOSED:
New Year's Day, Memorial Day, July 4th, Labor Day, Thanksgiving Day, Christmas Day
MISSION STATEMENT:

COLLECTION:

STATISTICS:

BORROWING MATERIALS:
The Aurora Libraries are dedicated to providing quality healthcare-related information to all Aurora-associated administrators, medical and house staff, nurses, allied health professionals, employees and students for work-related patient care or research, or in support of affiliated educational programs. The Aurora Libraries also recognize and support the patient’s right to healthcare information.

The information-gathering services of the Aurora Libraries are provided to Aurora healthcare professionals and affiliated students because Aurora Health Care believes that information leads to better decision making which in turn contributes to cost-effective and high quality patient care.

— Taken from the Mission Statement of the Aurora Health Care Libraries

Over 15,000 books
700 active journal subscriptions
Over 2500 audiovisuals

Over 65,000 reference questions/year
Over 14,396 Interlibrary Loans received for customers/year
Over 12,000 sessions on Aurora Libraries Database Network/year
Over 3,540 literature searches run by Librarians/year
Material shelved 47,231
New material added 15,821

* 1997 statistics

Privileges
All members of the Aurora Health Care System have borrowing privileges.

Loan Material
Books or audiovisuals not designated R, RLO, or REF may circulate for 14 days. Journals do not circulate; certain exceptions made at the discretion of the library staff such as for making slides.

Renewal
Library material may be renewed for an additional loan period unless it is requested or reserved by another patron.

Withdrawal of Material
Print your name, department, and phone number on the check-out card. Library staff will give you date due cards to insert in the book pockets.

Lost Material
Books, journals, audiovisuals, etc. are the responsibility of the borrower and if they are lost they must be replaced by the borrower.

Overdue notices will be sent when materials are not returned on time. If the item has not been returned after three notices, the cost of the item and a $10 processing fee will be charged or taken as a payroll deduction.
SERVICES:
Reference Service
Call your librarian for a quick fact from a directory, dictionary, statistical source, or textbook.

Database Searches
The Aurora Libraries have access to hundreds of biomedical, business, education, and news databases through OVID, MICROMEDEX, MEDLARS, and DIALOG. A list of articles on your topic can be provided by the Librarian to meet your time frames.

Interlibrary Loan
Library staff can obtain materials not available in-house through a nationwide resource-sharing network. Articles may be faxed for urgent patient care or administrative needs.

Current Awareness Service
For any topic in which you have a continuing interest, your librarian can create and save a search strategy in an appropriate database and mail or e-mail monthly updates to you.

The Table of Contents for Administrators is a bimonthly current awareness service for Aurora managers, directors, and administrators.

End User Searching and Training
Computer terminals are available in each Aurora Library for individuals to conduct their own literature searches. Access to the Aurora Libraries Database Network from your office or home computer is also available. Call your Librarian for a Password Application Form or class schedule. Internet classes are also offered by our Systems Librarian.

Verification of Bibliographies
Given one week's notice, your Librarian will verify your list of references for the article or book chapter that you are writing.

Photocopy Services
Photocopy machines are available in each Library. Aurora-affiliated employees, medical staff, and students may use the photocopy machines for work-related copying at no charge. Personal copying or copying by non-affiliated users may be done at 10¢/page.

Book and Journal Ordering
All Aurora magazine subscriptions are ordered through Marcy Lisiecki at (414) 649-7359 at the Medical Library at St. Luke's Medical Center. Department book orders, including the ISBN number, are sent directly to the Purchasing Department at the Heil Center.

Health Information Service
Patients, family members, and the community in eastern Wisconsin are welcome to come to the Aurora Libraries to gather information concerning newly diagnosed conditions or about disease prevention and coping skills. Brief packets of information may be mailed. Material provided is for informational purposes only and should not be taken as medical advice or interpretation. (Research for school papers is the responsibility of the student.)

Alphabetical Order

Databases Using OVID Technologies Menu-Driven Software

MEDLINE
MEDLINE is a National Library of Medicine (NLM) database of medicine, dentistry, nursing, veterinary medicine, and the preclinical sciences that indexes over 3800 of the world's biomedical journals. Coverage is from 1966 to the present. Abstracts (if available) have been indexed with medical subject headings (MeSH) from a controlled vocabulary arranged in hierarchical tree structures. MEDLINE contains all citations published in Index Medicus and is the primary biomedical database in use in the United States.

CANCERLIT
CANCERLIT is an NLM database covering all aspects of the cancer literature from 1983 on. It overlaps with MEDLINE but also includes non-MEDLINE materials: monographic series, government reports, symposia reports, dissertations, books, theses, and meeting abstracts. It covers cancer therapy, mutagenesis, carcinogenesis and carcinogens and the biology of neoplasms.

HealthSTAR
HealthSTAR is an NLM database created in 1996 from the merger of the HEALTH Planning and Administration database and HSTAR Health Services/Technology Assessment Research database. It focuses on the clinical and non-clinical aspects of health care delivery, including evaluation of patient outcomes, effectiveness of procedures, programs, and products, as well as administrative topics such as economics, planning, and policy. HealthSTAR includes references to journal articles, books, book chapters, technical reports, clinical practice guidelines, theses, and meeting abstracts. Coverage is from 1975 forward in four files.

NURSING-CINAHL
CINAHL (Cumulative Index to Nursing and Allied Health Literature) is a non-NLM database that indexes over 900 nursing and allied health journals, publications of the American Nurses' Association and the National League for Nursing, relevant articles from MEDLINE and from other journals as well. Coverage is from 1983 on.
INFORMATION ACCESS CO. CONSUMER DATABASE:

ONLINE BOOK CATALOG:

SCIENTIFIC AMERICAN TEXTBOOK ON CD ROM:

MICROMEDEX DRUG DATABASES ON THE AURORA MAINFRAME:

QUICK MEDICAL REFERENCE (QMR):
**CLINPSYC**

ClinPSYC is a non-NLM database covering clinically-oriented psychology and psychiatry journal articles from Psychological Abstracts from 1980 on.

**HEALTH REFERENCE CENTER**

The HEALTH REFERENCE CENTER database produced by Information Access Co. is consumer-oriented and includes health information from pamphlets, textbooks, popular magazines and newsletters, and some professional journals. Coverage is the most recent five years and the full text of these easy-to-read materials is often available online.

**ONLINE BOOK CATALOG**

The AURORA LIBRARIES BOOK CATALOG is an online book and audiovisual catalog to the collections of the St. Luke's, St. Luke's South Shore, Sheboygan, West Allis, Hartford and Sinai Samaritan Libraries; Organizational Development; Nutrition Services; Women's Health Care; the Vince Lombardi Cancer Center; The Karen Yontz Women's Cardiac Awareness Center and the Sinai Samaritan Psychiatry department collection. It also includes patient handouts used in various hospitals of Aurora.

**SAM-CD**

SAM-CD is the online counterpart to the full Scientific American internal medicine textbook.

**POISINDEX**

The POISINDEX System is a detailed toxicology database designed to identify and provide ingredient information for over one-half million domestic and foreign commercial substances. The POISINDEX System also provides detailed symptomatology and management/treatment protocols in the event of a toxicology problem due to ingestion, dermal absorption, eye exposure, or inhalation of any of the substances listed. The POISINDEX database may be searched by brand or trade name, manufacturer's name, generic or chemical name, street or slang terminology, or botanic and common name.

**DRUGDEX**

The DRUGDEX System is an up-to-date, unbiased, and referenced drug information system. This system includes both Drug Evaluation Monographs and Drug Consults on investigation, foreign, FDA approved, and OTC preparations. This system is indexed by U.S. and foreign brand/trade names, generic names, and disease states.

**IDENTIDEX**

The IDENTIDEX System identifies pharmaceutical tablets and capsules by imprint code and secondary characteristics, such as color and shape. Prescription and over-the-counter drugs are included, as well as many international and street drugs.

**REPRODISK**

The REPRODISK System is a unique collection of reproductive risk information databases. The system is helpful when assessing reproductive risks of drugs, chemicals, and physical and environmental agents to females, males, and unborn children.

**CARE NOTES**

CARE NOTES provides lay-level information on selected illnesses, injuries, and drugs.

**QMR**

QMR is a diagnostic reasoning database that accepts a list of your patient’s history, symptoms, signs, and/or labs. In return, the program provides you with a differential diagnosis ranked in order of the most likely to the least likely. QMR covers 600 disorders and 4500 findings; for each disease these are ICD-9 Codes and a list of all possible complications to watch for.
