Purpose
This course is designed to present new developments in the field of cardiovascular disorders, as well as their clinical applications, in order to encourage discussion and promote improved patient outcomes in all our practices.

We have chosen topics and presenters to cover the latest in familiar topics as well as map out areas of frontier exploration.

Objectives
At the end of this course, participants will be able to:
1. List the latest treatments in 5 most common vascular problems
2. Interpret the indications for action in treating
3. Compare new treatments in Cardiovascular disease

Target Audience
This symposium is designed for family practitioners, internists, cardiologists and emergency department physicians who diagnose, treat and manage patients with cardiovascular disorders. It will also be of interest to fellows, residents, PA, NAs and other allied health professionals interested in cardiovascular disease.
