Tremendous strides were taken in 1965 toward making St. Luke's Hospital one of the most comprehensive medical facilities in the Milwaukee metropolitan area.

Of great significance was the opening of our 250-bed addition which includes a 34-bed inpatient psychiatric unit and, for the first time in a general voluntary hospital in Milwaukee, a 34-bed inpatient rehabilitation section. In addition, remodeling began on the existing building to provide for an intensive care unit, air conditioning, 10 surgical suites, an expanded pediatric department, a mechanical equipment building and work progressed on the laboratory for hyperbaric medicine.

Also, it became apparent during the year that St. Luke's cardiac team was responsible for a high percentage of all open and closed heart operations in the area. Equally noteworthy was the activity of our cardiac catheterization team which performed 179 procedures.

The statistical data, pictures and editorial content found in this annual report highlight the hospital's progress during 1965. The material cannot reflect the outstanding cooperation and initiative of our employees, the medical staff, the board of directors and the many friends of the hospital in perpetuating the traditions of quality care and friendly atmosphere at St. Luke's for all patients.

William M. Chester, Jr.
Acting President

pictorial highlights of 1965

New facilities and services were made possible during the year with the completion and opening of our new addition.

Therapy in the new inpatient rehabilitation department.

Work done in one of the new laboratories is explained to open house guests.

During the open house last fall the new computer was a focal point of interest to visitors.

A skilled surgical team during an open heart operation.

St. Luke's Hospital chapel is available to members of all faiths.

A portion of the spacious and comfortable new lobby.
The X-ray department, with its intricate equipment, captures the attention of visitors.

Increased employment in the expanded hospital required this larger cafeteria.

*Deceased

The caduceus represents the medical profession. The sphere represents the world-wide scope of the medical practice, and the winged calf with the halo is the accepted ecclesiastical symbol of the sacrificial nature of St. Luke, the Apostle Physician. Thus, the mobile personifies St. Luke’s Hospital.
